2025 COMMUNITY & SOCIAL HEALTH SNAPSHOT

SANTA ROSA

Care beyond our walls

Serving communities around our Santa Rosa medical facilities.

At Kaiser Permanente, we believe your health matters, even if you're not our patient. That's why we reach beyond our medical center walls to improve health in the communities we serve. In 2025, we provided $399,942 in grants and donations to community partners in our Santa Rosa service area to address critical health needs. Here are examples of our support in action.

Access to care

Our grant to Jewish Community Free Clinic expanded free primary care and mental health services for uninsured patients. The clinic provides comprehensive health care, helping community members access treatment, healing, and stability.

> **"A single mother of 2, unable to afford counseling and without insurance, had nearly lost hope after months of searching for help. With the help of our free services, she's learning to manage post-traumatic stress disorder and receiving acupuncture for healing."**
>
> **– Donna Waldman, executive director, Jewish Community Free Clinic**

Housing for health

Our investment in Community Support Network helped fund residential and supportive housing programs for young adults and adults in Sonoma County affected by trauma and addiction. Participants build independent living skills, take part in recovery services, and gain stability, wellness, and greater self-sufficiency.

Kaiser Permanente®

Education

We funded Santa Rosa Junior College's Health Occupation Preparation & Education Program to prepare 150 first generation college students to enter high-demand health care careers. The program offers students workforce readiness skills, plus academic, social, and financial support.

Mental health

Our grant to Women's Recovery Services expanded residential substance use treatment for women, enabling mothers to keep their children with them throughout recovery. The program provides a safe, supportive environment where families can heal together while women build stability and hope.

> **A woman who entered treatment arrived angry and resistant. Two weeks later, she shared, 'This is the first time I've ever experienced being around a group of women who want something different for their lives.' She now feels supported with compassion, hope, and a path forward.**
>
> **– Diane Madrigal, Executive Director, Women's Recovery Services**
